Title: VIRAL OBESITY METHODS
AND COMPOSITIONS

Our Ref: 710395.90010

DECLARATION OF RICHARD L. ATKINSON

I, Richard L. Atkinson, on oath depose and say that:

1. I am one of the inventors of the above-identified patent application and I make this declaration in support of that patent application.
2. I am a professor of clinical nutrition in the Medical School at the University of Wisconsin-Madison. The work described in this patent application was conducted in my laboratory at that research institution.

3. I am one of the authors of the abstract published at the meeting on the metabolic aspects of obesity in 1997 and referred to as the "Dhurandhar et al." abstract in the file of this patent application. That abstract lists three inventors, myself, Nikhil Dhurandhar and Ayanna Augustus. Ms. Augustus was an undergraduate student who was providing research laboratory assistance in my laboratory to myself and Dr. Dhurandhar, during the work described in that abstract. Ms. Augustus did not contribute intellectually to the invention as claimed in this patent application. Ms. Augustus provided research technical support only for the project at the direction of either Dr. Dhurandhar or myself. Ms. Augustus was included as an author of the "Dhurandhar et al." abstract as a courtesy to her in recognition of her diligent effort to support this project.

4. I hereby declare all statements made herein of my own knowledge are true and all statements made on information and belief are believed to be true; and further that these statements are made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and the such willful false statements may jeopardize the validity of the application or any patent issuing thereon.

Date: July 11, 2001

Richard L. Atkinson
